How the rankings work

Priority reflects premise match, Assassin's Creed plot importance, length, and completion or update status. Word counts are preferred; chapter counts are used when a platform does not expose words. Ongoing statistics can change.

Exact SI / Reincarnation Matches

#	Story	Length	Status	Why it fits
1	System in Assassin's Creed	327 chapters observed	Ongoing	Modern shut-in reborn as Edward Kenway's cousin; later expands into Naruto.
2	A Third Son of Prophecy	100 chapters; ~160k by ch. 51	Ongoing	HP reincarnator with Isu blood, Eagle Vision, ancestral dreams, and Brotherhood ties.
3	Traveler: Starting at AC World	74 public chapters	Ongoing	Atlas Li reincarnates in Odyssey, knows Deimos's fate, then leaves for other worlds.
4	Soul Bound Ledger	59 chapters	Ongoing	Trent Sullivan wakes as Ezio and prevents multiple Auditore deaths.
5	A Game, or Real Life?	158,993 words / 38 ch.	Complete	Reader protagonist sent by Minerva to 1476; covers several AC eras.

#	Story	Length	Status	Why it fits
6	I Am Borgia	23k words / 16 threadmarks	Dormant	Genuine SI reborn as Luciano Borgia with political and canon knowledge.
7	The Courtesan	8k words / 3 threadmarks	Dormant	Renaissance AC SI/AU inspired by I Am Borgia; too short for the main list.

Important distinction: *System in Assassin's Creed* is the longest exact male SI, but it is an extreme power fantasy with Naruto abilities and later Naruto-world content. Royal Road labels it AI-assisted. *Soul Bound Ledger* is the cleanest direct Auditore rescue premise.

Detailed Reading Notes

Assassin's Creed: Transcendence

513,167 words | 87/87 chapters | Complete | Percy Jackson crossover

Percy's soul is displaced into the historical past while several demigods become reincarnations of major Assassins. Desmond, Altaïr, Ezio, Edward, Haytham, Connor, Arno, the Fries, Cassandra, and others feature. The story actively attacks Templar power and changes history rather than using AC as a cosmetic power set.

Note: Mature, complicated reincarnation identities and relationships; Percy is not a normal outside-world AC fan.

Eagle of Alamut

467,628 words | 129/129 chapters | Complete | Desmond/Altaïr

Desmond survives the Eye, wakes in his sixteen-year-old body in the 12th century, and joins Alamut rather than walking directly into Masyaf's known disaster. It combines long-form worldbuilding with sustained canon divergence and gives Desmond room to intervene in Altaïr's life.

Note: M/M slow burn. The author labels the fix-it 'sorta,' but the scale and completion make it the safest first recommendation.

The Secret Histories

230k+ words in main volumes | Ongoing series | AC/The Secret World

After the Grand Temple, Desmond wakes alive in a parallel reality and discovers that the Assassin-Templar war is only one layer of a much larger supernatural conspiracy. The first volume is complete at 37,229 words; the second exceeded 192,000 words, with later volumes continuing the plot.

Note: Begins gen and develops toward Shaun/Desmond without making romance the primary plot.

Traveler: Starting at AC World

74 public chapters | Ongoing | Male reincarnation and world travel

Dr. Atlas Li is reborn in Odyssey's era and recognizes the child Alexios as the future Deimos. He intervenes using modern knowledge, then unlocks a Traveler ability and moves into other worlds, including a futuristic alien-war setting.

Note: The AC arc is substantial but the story later shifts away from AC. Public and Patreon chapter totals differ.

Soul Bound Ledger

59 chapters | Ongoing | Modern man reincarnated as Ezio

Trent Sullivan wakes in Ezio's seventeen-year-old body shortly before the Auditore betrayal. He uses foreknowledge, modern planning, and an Isu-linked interface to evacuate the family. The text explicitly records multiple Auditore family members alive who should have died.

Note: System mechanics are prominent. This is the most literal match for 'knowledgeable outsider fixes AC tragedies.'

System in Assassin's Creed

327 chapters observed | Ongoing | AC/Naruto multiverse

A modern shut-in is reborn in 1693 as Edward Kenway's cousin. The early story uses AC history and modern knowledge, but the protagonist gains a shop selling Naruto abilities and eventually crosses fully into Naruto material.

Note: Extremely overpowered, profanity-heavy, and AI-assisted according to Royal Road. Best for length and premise, not for AC purity.

Rebirth

216,505 words | 53 chapters | Ongoing | Cassandra redo

Kassandra dies in Atlantis and awakens back on Kephallonia. She is overpowered, armed with future knowledge, and explicitly positioned to prevent Odyssey's tragedies, including Phoibe's death.

Note: Mature and polyamorous. Best choice for readers more interested in Odyssey than Desmond or Ezio.

December 21st

214,732 words | 24/24 chapters | Complete | Clay/Desmond

Clay escapes the Animus through Desmond, and together they replay the modern events of Revelations and AC III while searching for a solution that saves the world without accepting the original fatal outcome.

Note: Dialogue-heavy M/M slow burn with identity and consent complications.

Additional Findings and Caveats

Story	Assessment
<u>Old Master</u>	51,931 words, complete one-shot. Altaïr remembers his previous life while growing up in 1987; modern-day fix-it and part of Project Eurydice.
<u>Cantarella</u>	24,394 words, complete one-shot. Desmond is reborn as Giovanni Borgia and changes Renaissance relationships and outcomes.
<u>A New Way to Do Things</u>	20,938 words, complete one-shot. Clay is reborn in 1756 near Connor's village; deliberate time-travel fix-it.
<u>Ouverture</u>	25,281 words, complete one-shot. Desmond reincarnates in France and intersects with Arno's era.
<u>Golden Threads</u>	29,895 words across three works. Desmond, Altaïr, Ezio, and Connor cross timelines through the Eye.
<u>Let Me Be Without Regret</u>	17,164 words, 2/2 chapters. Popular Auditore-family-adopts-Desmond time-travel fix-it, but below the requested length.
<u>Assassin's Creed: Elijah</u>	63,106 words, 20 chapters and active. Modern AC continuation centered on Elijah rather than a reincarnator.
<u>A Game, or Real Life?</u>	158,993 words, complete. Strong outside-world/reader premise, but romance is more central than systematic tragedy repair.
<u>A Third Son of Prophecy</u>	100 chapters. Strong HP reincarnation and AC-lore hybrid; the author warns that major AC plotlines arrive much later.
<u>In the Creed's Shadow</u>	About 151k words and active. Substantial Fate crossover, but marked AI-assisted on SpaceBattles.

Metadata note: AO3 exposes exact words and chapter counts; WebNovel and forum sites often expose only chapters or threadmarks. Counts in this report reflect the latest values found during research and should be treated as snapshots, not permanent totals.

Search Scope

Searches covered AO3, FanFiction.net, WebNovel, Royal Road, SpaceBattles, Sufficient Velocity, Wattpad, Scribble Hub, recommendation threads, and general web results. Candidate stories were retained when Assassin's Creed characters, factions, Isu lore, historical settings, or tragedy repair remained meaningful. Very short works, abandoned openings, unrelated uses of the word 'assassin,' and cosmetic hidden-blade crossovers were deprioritized.
